PROJECTS

RESTAURENT MANAGEMENT *java*
Restaurant management involves overseeing all aspects of a restaurant's operations to ensure excellent
customer service, efficient kitchen and dining operations, effective staff management, and profitability.
Managers handle day-to-day operations, staff hiring and training, food and beverage quality control, financial
management, health and safety compliance, and marketing efforts. They must possess strong leadership,
organizational, and problem-solving skills to ensure the restaurant's success.

BUDGET MANAGEMENT SYSTEM *Pyhon*
Budget management involves the process of planning, monitoring, and controlling financial resources to
achieve specific goals within a defined timeframe. It includes creating a budget, tracking income and
expenses, making adjustments as necessary, and ensuring that spending aligns with financial objectives. The
goal of budget management is to optimize resource allocation, minimize financial risks, and achieve desired
outcomes efficiently.
